

Certification continues to grow and influence how we do business

New Zealand GAP is committed to the safe and sustainable production of fruit and vegetables in New Zealand.

Our certificate is trusted and recognised by growers and customers here and overseas.

FOOD SAFETY

We help prevent food safety issues including food illness, harmful contamination and agrichemical residues.

ENVIRONMENT

We actively promote sustainable farming practices including the protection of soil, water and natural resources.

SOCIAL PRACTICE

We are committed to protecting the welfare and safety of all workers.

New Zealand GAP is an assurance scheme for the New Zealand horticulture industry.

It gives confidence to consumers in the safety and sustainable production of NZ fruit and vegetables.

The NZGAP framework provides independent assurance of, and communicates, our commitment to safe and sustainable growing practices.

Created by New Zealand growers over 20 years ago, NZGAP brings integrity to the commitment that they have to their customers, their local communities and all New Zealanders.

The NZGAP logo is a trusted quality mark for good agricultural practice in New Zealand.

Measuring our impacts

NZGAP is working with the NZ Sustainability Dashboard team to develop a set priorities and objectives for the programme. In the future, we will measure the impacts of the programme and report these in the dashboard system.

Government recognition

We are working towards achieving recognition of NZGAP as meeting the requirements of the Food Act, Health & Safety at Work Act, and the Resource Management Act.

Innovation

We are improving data capture from the farm, testing services, audits and elsewhere.
